ACRYLITE® Heatstop acrylic sheet

Equivalent light with one-half the heat

ACRYLITE Heatstop sheet reduces heat build-up indoors

ACRYLITE Heatstop sheet is an IR-reflecting sheet that reflects a large portion of incident solar radiation to limit the amount of heat entering a building while allowing an abundance of natural sunlight. This characteristic helps reduce energy consumption and makes ACRYLITE Heatstop sheet a product that is well suited for "green" buildings.

By using ACRYLITE Heatstop sheet in place of traditional acrylic glazing materials, average annual air conditioning costs can be lowered by as much as 33%. At the same time, ACRYLITE Heatstop sheet allows natural sunlight to illuminate interiors, reducing dependence on electrical lighting. This makes it ideal for rooftop glazing applications in warehouses, grocery stores, and other large commercial spaces, particularly in the warmer southern climates.

Features & Benefits

- Proprietary performance formulation provides strong and uniform natural lighting
- IR-reflecting properties help reduce energy costs and lower internal ambient room temperatures
- Forming and cold-curving attributes of traditional acrylic sheet products

Applications

- Skylights
- Light domes
- Solariums
- Bus shelters

Standard Product Offering

Size: 54" x 108"; 76" x 108"

Thickness: .118" (3.0 mm)

Color: White WZ005
